

TIPS FOR

SAFEGUARDING AGAINST ATM FRAUD

1. Keep your *Access Plus* debit cards in a safe place, never to allow another person to use your card
2. If you are no longer utilizing your card, dispose of it by cutting it up
3. Never allow your card to be out of sight
4. Protect your **PIN** code
5. Try as best as you can to utilize proprietary **ATMs** that form part of the financial institution building, as the presence of security guards will deter fraudsters. **ATMs** that are stand-alone tend to be targeted by fraudsters who can place their devices to capture cards and **PINs** without detection
6. The fraudsters have been collecting data on the cards via the door swipe. Therefore do not open the **ATM** vestibule door with the card of the account you are going to access. Instead use another card, for example a magna card or other card.
